

## Wastewater Utility Green Power Report

September 2010

Electricity Generated in September: **72,720 kWh (kilowatt hours)**

This amount of electricity would have cost \$5,090 if it had been purchased from Duke Energy.

Producing this electricity on-site prevented the emission of approximately 65 tons of carbon dioxide.

This amount of carbon emissions is about that of 12 average cars for a **year**.

Over **65,000 gallons of grease** were processed in our digesters for the month.

**2010 Year to Date Total: 505 Megawatt hours**

**(14% of our plant's power)**

The City of West Lafayette's Wastewater Utility has pledged to generate at least 6% of its electricity on-site as Indiana's first wastewater plant to become an EPA Green Power Partner.
